

Healthy School Environment

Meridian ISD maintains a healthy school environment in which all students can learn. The positive physical and psychosocial culture and climate of each campus allows all students a safe learning environment.

By maintaining this type of environment the following student benefits are achieved:

- A feeling of support by students from administrators, teachers and peers to reach their full potential
- A safe environment; free from environmental pollutants and other physical hazards including the presence of predators, drugs and weapons
- Helps students develop a positive affiliation with the school environment. These students are also more likely to remain academically engaged and less likely to be involved in misconduct at school.
