Trapping Leprechauns

In a group effort between Kindergarten and 4th & 5th grade STEM classes, students built and tried to catch some pesky leprechauns. The leprechauns disrupted parts of our school including the library, office, front entry and several classrooms. They even broke into Ms. Dowler's office and left jokes and clues for her to share with students every day. Kindergarteners were determined to catch them but alas, they could not. On Friday, March 10, the leprechauns did leave students a treat for all of their efforts.

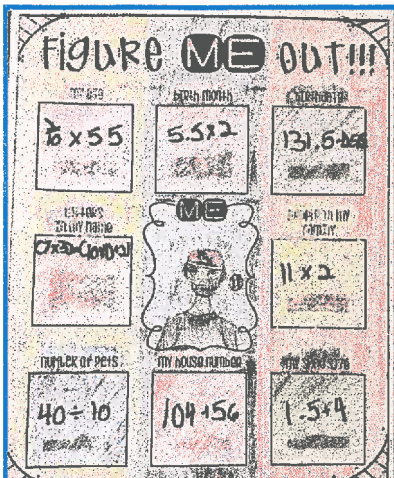

My Favorite Part of Me

3rd graders were asked to choose and write about their "Favorite Part of Me". Students also worked together taking pictures of those 'parts' to display for open house and our visitors had to guess who the owner was.

2nd Grade Selfies

Students made "selfies" to decorate their classroom and then as part of our writing initiative, they wrote a personal narrative describing themselves and their interests.

4th & 5th Grades Figure Me Out

In math, students had to write equations that were mathematically their date of birth, age, house number, etc.
